

Error Tight

- Julia came up with this activity for your lab, but we're going to adapt it for our purposes
- You can find the original exercise here: <https://psyarxiv.com/rsn5y>
- If you need lead a lab meeting but you don't have anything to present, do this!

Step 1: Designing/programming experiment

With Groups

- In your group, the person who was assigned this topic please describe how you (or your lab) goes about this. If you do not have an active research program, defer to someone who does have an active research program.
- Your group needs to come up with ideas on **where errors could come up** in this area
- What did you come up with? **How do we avoid these mistakes?**
- Someone in the group take notes
